Summary

I am a web developer with a passion for creating "well designed" single-page applications. Bringing a deep military background with developed skills in leadership, communication, and teamwork.

Looking to be part of a small or medium well-structured and organized group. With team members that can help me grow and continue to expand my knowledge.

Experience

Indominus

Web Developer

Nov 2018 – Apr 2019 (6 Months)

Indominus is a next-generation commercial software vendor focusing on adding AI and Automation to IT operations in the IT consulting industry.

I implement designs and wireframes from the lead UX/UI to provide an excellent user experience. Part of the development team utilizing agile methodology. Applying the current best practices in the industry.

- Vue.js
- Vuex
- Vuetify
- Microsoft Azure / Azure DevOps
- Visual Studio

Canadian Armed Forces

Infantry Sergeant

March 2006 – Present (+ 13yrs)

- Assistant manager to an organization of 30-60 infantry soldiers.
Ensuring the members are properly trained, supplied and prepared to accomplish any task.
Recently deployed members to support the domestic flooding operations in Quebec.
- Awarded
 - 2015 for outstanding work and commitment to the organization.
 - 2016 for excellent work as 2nd in command of Nijmegen marching team.
 - 2017 for exceptional performance as the senior instructor teaching on a recruit course.

Instructor – Canadian Forces Leadership and Recruit School

Feb 2015 – Oct 2015 (9 Months)

- Provided training and instruction to approximately 180 new recruits joining the Canadian Armed Forces. Teaching students in a wide variety of subjects such as navigation, discipline, physical fitness, dress and deportment and military tactics.

Instructor – Operation Athena

Nov 2010 – July 2011 (9 Months)

- Part of the operational mentor and liaison team. During my deployment we helped train approximately 2000 Afghan National Police members as well as implemented a linguistic program to teach the students how to read and write.

Education

DecodeMTL

Feb 2018

Intensive full-stack web development bootcamp that teaches the fundamentals of programming, front-end development, and back-end development.

During the course my team built several projects such as a marketplace website, allowing users to buy and sell items from other members. As well as a web app that allows users to simplify their night life experience. Using live data from surrounding venues to make informed decisions on where to go.

Front-End

- JavaScript
- React.js
- HTML5
- CSS3
- jQuery
- Bootstrap
